EXAMINER'S AMENDMENT/COMMENT

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The primary reason for the indication of the allowability of claims 1-18 is the inclusion therein of the limitations of determining (1) if an error exist in the home position on the condition that the distance between the first position and the second position is not same as the maximum moving distance of the carriage, or when a second currently-determined position is not same as a second previously-determined position; and (2) if an error does not exist in the home position on the condition that: the distance between the first position and the second position is same as the maximum moving distance of the carriage and the second currently-determined position is same as the second previously-determined position. These limitations are neither suggested nor taught by the prior art of record, alone or in combination as claimed.

U.S. Patent 6,390,698 to Yoshida et al. discloses detecting the home position of the carriage. However, the distance between the first location and the second location being determined as the carriage traveled in one direction from the left frame to the right frame of the printer, and being compared to the predetermined maximum distance the carriage travels within the home position range not frame to frame.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
